

QUARTEK

Engineering services with a difference

Our story

Introducing Quartek

After a whirlwind 2021, we thought we would end the first year of the new decade with a bang. And what better way to do it than to launch (drumroll please) our new look website!

You'll probably be surprised to know that the vision for this website has been in the works for seven years. That's right, seven years. Why so long, you may ask? Well, as they say, grow before you show. So, we thought we'd grow a little and then toot our horns. Not to say we didn't have a website before; that we did. But this one is something special!

Now that we've made the big announcement, if you're new to the world of Quartek, you might be wondering who we are, what we do, and what makes us different? So, without further ado, let's answer these questions.

A little bit about us

Established in 2014, Quartek was founded by a group of engineers passionate about the projects they work on and the people they work with. Today that passion remains and is the driving force behind not only our success but the projects we've delivered with our clients, partners, and collaborators.

With decades of combined experience, our team's skillsets range from applied engineering, such as aerospace and automotive structures, safety-critical software development and electronics and avionics, through to policy development, engineering management, airworthiness, and certification. Therefore, you can rest assured the work is in experienced hands.

At the heart of our organisation are four core principles: Trust, Quality, Integrity and Value. These are present in everything we do.

Well, that's a little bit about our history in a nutshell. But if you'd like to know more, we're always happy for a chat! In the meantime, head on over to our About us page for more detailed insights.

What we do

By now, you've probably got the gist that we work within the field of engineering. But what exactly do we do?

When we're not flying paper planes and playing Picasso as we practice keeping our creative juices flowing, we're busy working on some of the most technically engaging and challenging projects.

Our Services

At Quartek, we specialise in providing engineering services to the following sectors:

- Aerospace
- Land vehicle
- Maritime
- Rail
- Energy

We provide process-driven and delivery focused services, specialising in

Applied engineering and analysis – ranging from structural analysis, in service and through life support, capability enhancement, manufacturing support, and electronics and avionics.

Consulting and advisory – this includes systems engineering, test and evaluation documentation development, and engineering policy.

Project management and integration – such as planning, execution, engineering, and documentation.

Software and automation – Custom applications, software modifications and updates, and software certification.

With our wide range of models, we'll have something to suit your every requirement. What's more, with our adaptable approach, you can benefit from tailored services to suit your needs.

Why choose Quartek?

So, you have a career move or a project on your mind? It's no surprise that you want only the very best team working alongside you. With that in mind, below are some of the benefits you can reap when working with the team at Quartek.

Genuine Australian owned and operated

Being genuinely Australian owned and operated not only sets apart from many organisations like ours, but it also directly aligns with the government's policy towards developing a Sovereign Industrial Capability (SIC) by growing Australian Industry Content (AIC).

We are fully accredited

At Quartek, we are proud to carry and work within the following accreditations, which ensure high quality, robust, and repeatable results.

- ISO9001:2015 Quality Management
- DISP Member (Defence Industry Security Program)
- DSS Panel Member (Defence Support Services)

We keep all work in Australia

Not only is this cost-effective, but we believe Australia has some of the best talents in the world, so let's foster, grow, and deploy that. Again, this also aligns with the government's policy on SIC and AIC, as mentioned earlier.

Award-winning customer service

Our team have been awarded a customer service rating of 'World's Best Practice' from global aerospace primes, as well as Tier 1 Australian defence suppliers on multiple projects.

Highest standards of quality and service

Having the best people in the business means we can deliver the highest standards of quality and service. Quartek has on several occasions received a client feedback rating of "world's best practice".

We can go on and on with an endless list of why to consider us for your next project, but we think we'll leave at this for now. In the meantime, why not find out for yourself?

Make your next move

We're here to support you no matter what your engineering challenges might be. Reach out and connect with us to see how we can help with your next task, project, or program.

With our office located in the Fisherman's Bend development precinct, alongside many of our clients and collaborators, we understand the importance of developing strong relationships. With this as a focus, we'd love the opportunity to discuss your requirements with you. Please feel free to pay us a visit or contact us with a phone call or an email.

We look forward to meeting with you.
